

## おぼえよう

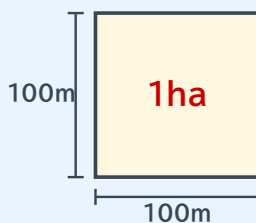

田んぼや畑の広さは **a(アール)** や **ha(ヘクタール)** で表します。

1a は 1辺 10m の正方形、1ha は 1辺 100m の正方形です。

$$1ha = 100a$$

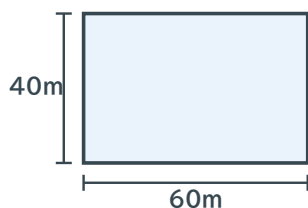

$$1a = 100m^2$$

$$1ha = 10000m^2$$

土地の面積を求めて、a や ha でも表しましょう。

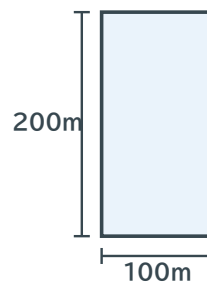

1

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = \boxed{\phantom{000}} m^2$$

$$= \boxed{\phantom{000}} a$$

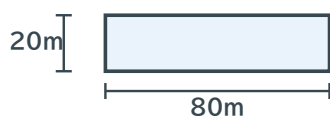

3

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = \boxed{\phantom{000}} m^2$$

$$= \boxed{\phantom{000}} ha$$

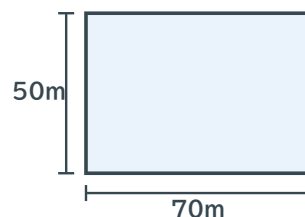

2

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = \boxed{\phantom{000}} m^2$$

$$= \boxed{\phantom{000}} a$$

4

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = \boxed{\phantom{000}} m^2$$

$$= \boxed{\phantom{000}} a$$
